

JC WILLIAMS
ELECTRICAL

The Garden Shed

This package is the bare bones for the shed owner who only needs somewhere to store the basics and potentially plug something in like a freezer. One of these power points can be used as the power for an automatic roller door

CONTENTS;

- 2 x LED BATTEN FLUOROS ●
- 2 x 10A POWER POINTS ●
- 1 x LIGHT SWITCH ●

The Tinkerer

This package is for the shed owner who likes to do bits and pieces around the place. Maybe you like to do a bit of basic woodwork or tinker away on your car. The addition of a sub board will prevent you from disrupting power supply to any other part of the property, as well as enabling you to upgrade in the future if you wish

CONTENTS;

- 1 x SUB BOARD
- 2 X CIRCUIT BREAKER
- 1 X RCBO (SAFETY SWITCH)
- 2 x LED BATTEN FLUOROS
- 4 x 10A POWER POINTS
- 1 x LIGHT SWITCH

The Engineer

This package caters to the shed owner who is a little bit more demanding on their circuits. If you are welding, running multiple items at once as well as having a fridge full of beer or a stocked up freezer, then this will be what you are looking for. There are 2 extra lighting points to reduce shadowing while you work, as well as an increase in the size of the cable feeding the sub board, allowing for greater flexibility in the future

CONTENTS;

- 1 x SUB BOARD
- 2 X CIRCUIT BREAKER
- 3 X RCBO (SAFETY SWITCH)
- 4 x LED BATTEN FLUOROS
- 1 x 15A POWER POINT
- 6 x 10A POWER POINTS
- 1 x LIGHT SWITCH
